

# AVALON MIDI HEIGHT

Fascia Configuration  
ML Larder

Pre-bored hole positions to use for  
ML Larder Ends

All positions shown are taken from 0.0.

Red = Pre-bored holes to use for shelf positions  
Fixed or Variable

Green = Pre-bored holes to use for Hinge Plates

## DRILLING POSITIONS FOR DOORS ML LARDER ENDS

Illustrated below are the Door & Drawer options for  
Oven Housings and Larder Ends.  
We recommend prior to the assembly of  
housings the installer makes themselves familiar with the  
door/drawer configuration they are to install.  
This should alleviate any misalignment which could occur if  
the installer does not read and digest the diagrams opposite  
which clearly illustrate the correct positions of all door and  
drawer configurations.

### Midi Height Housings Configuration. 1422mm. (Max. ht.) Door & Unit Sizes.

\* Venting is essential and subject to appliance  
manufacturers requirements.

Check alignment of adjacent units i.e. doors and drawers  
due to zero tolerance when ganged together.

Please note that many integrated appliances now require  
very specific drilling to suit their unique hinges, doors  
should be requested un-drilled to be fitted on site.
